SUMMARY

ERPNext Engineer and Software Developer with hands-on experience in building, customizing, and integrating ERP solutions using the Frappe Framework. Skilled in Python, JavaScript, API integrations and workflow automation, with exposure to QA, debugging, and production deployments. Strong analytical mindset with experience in data analysis and machine learning projects. Passionate about building scalable business solutions and continuously improving system quality and performance.

WORK EXPERIENCE

Software Developer Intern (ERPNext Engineer)

July 2025 – April 2026

Zasmlabs Pvt. Ltd. — Pune, India

- Developed and customized ERPNext modules to meet specific business requirements, including workflows, doctypes, and custom scripts. Built and integrated RESTful APIs to connect ERPNext with external systems and services.
- Automated processes using server-side scripts and client-side scripting (JavaScript, Python, Frappe framework). Worked with teams to design user-friendly dashboards, reports, and custom print formats.
- Participated in debugging, testing, and deployment to production environments. Collaborated with cross-functional teams (UI/UX, backend, QA) to ensure smooth delivery of ERP solutions.

PROJECTS

Airbnb Price and Demand Analysis

[View Project](#)

Analyzed Airbnb listings and booking trends in Barcelona using publicly available datasets to identify pricing patterns, occupancy behavior, and demand fluctuations. Performed data cleaning and preprocessing using Python libraries such as Pandas and NumPy, followed by the development of interactive Power BI dashboards for real-time data visualization. Generated insights on neighborhood-wise pricing, room type popularity, and availability trends to support data-driven decision-making for hosts and market analysts.

Hand-Written Digit Recognition Model

[View Project](#)

A machine learning project that combines deep learning with an interactive GUI. The model is trained on the MNIST dataset using Convolutional Neural Networks (CNNs) and integrated with a Tkinter-based desktop app, allowing users to draw digits on a canvas and get real-time predictions.

SKILLS

Programming & Scripting	Python, JavaScript, SQL
Frameworks & Libraries	Frappe Framework, React, Pandas, NumPy, Matplotlib, Scikit-learn
Databases	MariaDB, MySQL, PostgreSQL
Version Control	Git, GitHub, Docker, Bench CLI
Other Skills	Problem Solving, Debugging, Team Collaboration, API Testing, Power Bi

EDUCATION

2022 – 2025 **B.Sc. Computer Science**, , AKI's Poona College

CGPA: 9.0
